SUMMARY

I'm excited to be at the deployment phase of my new career as a web developer. I'm looking for an entry-level position to use my skills in creating visually appealing and interactive, responsive and optimized web applications. I also have an understanding of networks (TCP/IP, DNS), I am friends with Google and like to learn new things. My previous experience in design and sales helps me with UI and business processes

SKILLS

Frontend: HTML, CSS(Sass, Less), JS   Tools: Git, Terminal   Other: Figma, Ps
